## **PointSecure Products Seamlessly Support New HP Patch Delivery Services**

*PointAudit, PatchAnalyzer Help Ensure that Systems are Up to Date with the Latest Patches*

**HOUSTON – December 6, 2010** – Today, PointSecure, a leading provider of [security and auditing solutions for OpenVMS systems](#), announced that the PointAudit™ and PatchAnalyzer™ products seamlessly support HP’s changes to OpenVMS patch services.

“In an effort to continue to ensure that our customers’ OpenVMS systems are secure, available and performing optimally, PointSecure’s PatchAnalyzer and PointAudit products support HP’s new guidelines for patch access,” said Windy LaMarr, Product Manager at PointSecure. “Our products will continue to provide the same great value by allowing users to scan systems and compare patches installed on their OpenVMS system with the [OpenVMS patch listing](#), enabling them to keep systems up to date with the most current patches.”

Highly recommended by HP, PointSecure solutions provide OpenVMS users with the service they need to help prevent external and internal security threats in OpenVMS while ensuring compliance with corporate security policies and governmental regulations.

PointAudit helps to improve security and ensure compliance with regulatory and data security requirements such as Sarbanes-Oxley, GLBA, HIPAA, and Basel II by providing customizable, low-impact auditing and reporting on settings across multiple OpenVMS systems.

PatchAnalyzer quickly investigates systems, presents a list of the patches installed and a list of patches currently available from HP. OpenVMS users can then compare the two lists to

identify if systems require updating. In addition, Patch Analyzer provides a list of the products and licenses installed on systems.

**About PointSecure**

PointSecure is the market leader in security solutions for the OpenVMS platform, helping companies protect OpenVMS systems from both external and internal security threats while ensuring compliance with security policies and governmental regulations such as HIPAA, GLBA and BS779. Our customers include some of the largest OpenVMS installations in the world. Headquartered in Houston, Texas, PointSecure was founded by veterans in the OpenVMS and security management industry to provide proven, effective security technologies to the OpenVMS community. For more information or to schedule a live demonstration of PointSecure's solutions, please visit [www.pointsecure.com](http://www.pointsecure.com).
